Solna, Sweden

Pavlos Papadopoulos

Profile

Computer and Information Engineering graduate with a strong focus on Python development and software engineering principles. Experienced in building data-driven applications and working with SQL databases. Motivated by writing clean, maintainable code and solving real-world technical problems.

Employment History

Bachelor at Data2Value, Uppsala

03/2023–06/2023

Visualization Tool for Comparison of Healthcare Processes: Improving healthcare efficiency by utilizing visualization techniques

- Developed a healthcare process visualization tool using React, Node.js, Next.js, and PostgreSQL
- Focused on improving clarity and efficiency through interactive data visualization

Master at Digital Ecologies Lab, Uppsala

01/2025–06/2025

Analyzing Streaming Habits and Residential Energy Peaks

A Study on How Digital Streaming Demand Coincides with Household Electricity Consumption

- Analyzed streaming and energy consumption datasets using Python
- Investigated correlations between digital streaming behavior and household electricity demand peaks

Freelance Web Developer

06/2025–Present

- Maintained and improved an existing company website using HTML, CSS, and JavaScript
- Enhanced UI/UX design and customized website components
- Implemented feature updates based on client requirements
- Managed communication and iterative improvements with the client

Education

Bachelor's and Master's degree, Uppsala University

08/2020–06/2025

Master's Programme in Computer and Information Engineering, This was a civil engineering program which included both a Bachelor and a Masters in Computer and Information Engineering.

I chose to focus my Master's degree on Human-Machine Interaction which included the following research topics:

- Social Robotics & Human-Robot Interaction**
- Human-Technology-Organisation (HTO)**
- Technology Ethics & AI Safety**
- Sustainability in Digital Systems**

Skills

Programming:
Python (primary), Java, C/C++, C#, JavaScript

Databases:
SQL (MySQL, PostgreSQL, SQLite)

Web:
React, Node.js, Next.js, HTML, CSS

Tools & Practices:
Git, Docker (basic), CI/CD pipelines, Agile (Scrum, Kanban)

Languages

Swedish
English
Greek

Certificates

Google AI Essentials Specialization

Python Essentials 1 & 2 issued by cisco

Oracle Java Foundations
